Subject Index to Volume 25

A2O

- Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu 25 (2001) 1025

Accuracy

- Numerical integration of logarithmic and nearly logarithmic singularity in BEMs, V. Sladek, J. Sladek and M. Tanaka 25 (2001) 901

Adjoint problem

- Two-dimensional inverse heat conduction problem of source strength estimation in cylindrical rods, J. Su and A.J. Silva Neto 25 (2001) 861

Adsorption

- Modelling lumped-parameter sorption kinetics and diffusion dynamics of odour-causing VOCs to dust particles Y.-L. Yeh, C.-M. Liao, J.-S. Chen and J.-W. Chen 25 (2001) 593
A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption heterogeneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang 25 (2001) 1071

Aerodynamic mixing

- Simplified turbulence modeling for forced vortical mixers using a kinematic wave analogy, L.J. De Chant and J.A. Seidel 25 (2001) 427

Airborne dust

- Modelling lumped-parameter sorption kinetics and diffusion dynamics of odour-causing VOCs to dust particles, Y.-L. Yeh, C.-M. Liao, J.-S. Chen and J.-W. Chen 25 (2001) 593

Algebraic turbulence model

- Simplified turbulence modeling for forced vortical mixers using a kinematic wave analogy, L.J. De Chant and J.A. Seidel 25 (2001) 427

Analytical solution

- Simplified analysis of mode III dynamic rupture with geometric nonlinearity, F. Jia-shen 25 (2001) 793

ASM1

- Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu 25 (2001) 1025

ASM2d

- Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu 25 (2001) 1025

Axissymmetric membranes

- Designing the shape of a large scientific balloon, F. Baginski, Q. Chen and I. Waldman 25 (2001) 953

Balloon shapes

- Designing the shape of a large scientific balloon, F. Baginski, Q. Chen and I. Waldman 25 (2001) 953

Bayesian inference

- A stochastic approach to the flood control problem, M.G. Andrade, M.D. Fragoso and A.A.F.M. Carneiro 25 (2001) 499

Bifurcations of phase portraits

Smooth and non-smooth traveling waves in a nonlinearly dispersive equation, J. Li and Z. Liu

25 (2001) 41

Bioprocess

MIMO sliding mode control of a distributed parameter denitrifying biofilter, O. Bou-baker, J.P. Babary and M. Ksouri

25 (2001) 671

Boundary element method

Transient evaporative laser-cutting with boundary element method, M.J. Kim
Numerical integration of logarithmic and nearly logarithmic singularity in BEMs, V. Sladek, J. Sladek and M. Tanaka

25 (2001) 25

25 (2001) 901

Boundary integral equation

Fundamental solution and boundary integral equation of 3-D coupled thermoelasticity with non-small temperature changes in Laplace transform domain, M. Zhong and Y. Zhang

25 (2001) 347

Boundary layer

Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman

25 (2001) 803

Building energy analysis

Frequency-domain regression method for estimating CTF models of building multi-layer constructions, Y. Chen and S. Wang

25 (2001) 579

Characteristic functional

The general cumulants for a filtered point process, S. Yue and M. Hashino

25 (2001) 193

Characteristics Galerkin method

Numerical convergence for a sewage disposal problem, L.J. Alvarez-Vázquez, A. Martínez, C. Rodríguez and M.E. Vázquez-Méndez

25 (2001) 1015

Computation fluid dynamics

Three-dimensional simulation of high compressible flows using a multi-time-step in-

tegration technique with subcycles, P.R.F. Teixeira and A.M. Awruch

25 (2001) 613

Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman

25 (2001) 803

Conjugate gradient method

Two-dimensional inverse heat conduction problem of source strength estimation in cylindrical rods, J. Su and A.J. Silva Neto

25 (2001) 861

Control of the service process

On the *M/G/1* queue with *D*-policy, J.R. Artalejo

25 (2001) 1055

Controllability

Assessment of controllability-observability from the impedance matrix, R. Whalley, D. Mitchell and M. Ebrahimi

25 (2001) 299

Coupled thermoelasticity

Fundamental solution and boundary integral equation of 3-D coupled thermoelasticity with non-small temperature changes in Laplace transform domain, M. Zhong and Y. Zhang

25 (2001) 347

Crack retardation

Fatigue crack growth under variable-amplitude loading: Part I - Model formulation in state-space setting, A. Ray and R. Patankar

25 (2001) 979

CTF model

Frequency-domain regression method for estimating CTF models of building multilayer constructions, Y. Chen and S. Wang

25 (2001) 579

Cubic B-spline

Approximation of the RLW equation by the least square cubic B-spline finite element method, I. Dağ and M. Naci Özer

25 (2001) 221

Cumulant

The general cumulants for a filtered point process, S. Yue and M. Hashino

25 (2001) 193

Data assimilation

A data assimilation method used with an ocean circulation model and its application to the tropical Atlantic, K.P. Belyaev, C.A.S. Tanajura and J.J. O'Brien

25 (2001) 655

Derivation of equations

A revisit of spinning disk models. Part I: derivation of equations of motion, N. Badour and J.W. Zu

25 (2001) 541

Differential perturbative method

The differential perturbative method applied to the sensitivity analysis for water-hammer problems in hydraulic networks, J.L. Baliño, A.E. Larreguy, A.C. Lorenzo, A.G. Padilla and F.R. de Andrade Lima

25 (2001) 1117

Differential quadrature method

Coupling dual reciprocity BEM and differential quadrature method for time-dependent diffusion problems, M. Tanaka and W. Chen

25 (2001) 257

Diffusion

Modelling lumped-parameter sorption kinetics and diffusion dynamics of odour-causing VOCs to dust particles, Y.-L. Yeh, C.-M. Lao, J.-S. Chen and J.-W. Chen

25 (2001) 593

Diffusion process

A stochastic approach to the flood control problem, M.G. Andrade, M.D. Fragoso and A.A.F.M. Carneiro

25 (2001) 499

An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan

25 (2001) 743

Distributed memory

Parallel Schur complement method for large-scale systems on distributed memory computers, S. Kocak and H.U. Akay

25 (2001) 873

Domain decomposition

A simple numerical approach for assessing coupled transport processes in partition-

ing systems, M.G. Trefry, J. Öhman and G.B. Davis

25 (2001) 479

Dual reciprocity BEM

Coupling dual reciprocity BEM and differential quadrature method for time-dependent diffusion problems, M. Tanaka and W. Chen

25 (2001) 257

Duffing equation

Static and dynamic stability for geometrically nonlinear governing equations of elastic thin shallow shells, F. Jiasen

25 (2001) 775

Dynamic load-balancing

Dynamic load-balancing of finite element applications with the DRAMA library, A. Basermann, J. Clinckemaiillie, T. Coupez, J. Fingberg, H. Dignonnet, R. Ducloux, J.-M. Gratien, U. Hartmann, G. Lonsdale, B. Maerten, D. Roose and C. Walshaw

25 (2001) 83

EBPR

Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu

25 (2001) 1025

Ecological factors

Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar

25 (2001) 937

Ecosystem function

Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar

25 (2001) 937

Ejector nozzle

Simplified turbulence modeling for forced vortical mixers using a kinematic wave analogy, L.J. De Chant and J.A. Seidel

25 (2001) 427

Elastic thin shallow shell

Static and dynamic stability for geometrically nonlinear governing equations of elastic thin shallow shells, F. Jiasen

25 (2001) 775

Energy overspecification

- An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan 25 (2001) 743

Environmental radionuclides

- Modelling of U, Th, Ra and ^{137}Cs radionuclides behaviour in rivers. Comparison with field observations, M.J. Rodriguez-Alvarez and F. Sanchez 25 (2001) 57

Evaporative laser cutting

- Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang 25 (2001) 203

Fatigue and fracture

- Fatigue crack growth under variable-amplitude loading: Part I – Model formulation in state-space setting, A. Ray and R. Patankar 25 (2001) 979
- Fatigue crack growth under variable-amplitude loading: Part II – Code development and model validation, A. Ray and R. Patankar 25 (2001) 995

FDR method

- Frequency-domain regression method for estimating CTF models of building multi-layer constructions, Y. Chen and S. Wang 25 (2001) 579

Filtered point process

- The general cumulants for a filtered point process, S. Yue and M. Hashino 25 (2001) 193

Filtered Poisson process

- The general cumulants for a filtered point process, S. Yue and M. Hashino 25 (2001) 193

Finite difference method

- Noniterative solution of inverse problems by the linear least square method, J. Shaw 25 (2001) 683

Finite difference techniques

- An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan 25 (2001) 743

Finite elastic deformation

- Simplified analysis of mode III dynamic rupture with geometric nonlinearity, F. Jia-shen 25 (2001) 793

Finite element method

- Dynamic load-balancing of finite element applications with the DRAMA library, A. Basermann, J. Clinckemaulle, T. Coupez, J. Fingberg, H. Digonnet, R. Ducloux, J.-M. Gratien, U. Hartmann, G. Lonsdale, B. Maerten, D. Roose and C. Walshaw 25 (2001) 83
- Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang 25 (2001) 203
- Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman 25 (2001) 803

Finite element simulation

- Three-dimensional simulation of high compressible flows using a multi-time-step integration technique with sub-cycles, P.R.F. Teixeira and A.M. Awruch 25 (2001) 613

Fixed bed reactor

- MIMO sliding mode control of a distributed parameter denitrifying biofilter, O. Boubaker, J.P. Babary and M. Ksouri 25 (2001) 671

Fixed compressible phase

- The use of implicit flux limiting schemes in the simulation of the drying process: A new maximum flow sensor applied to phase mobilities, I.W. Turner and P. Perré 25 (2001) 513

Flexible linkage mechanism

- Robust observer-based frequency-shaping optimal vibration control of uncertain flexible linkage mechanisms, W.-H. Liao, J.-H. Chou and I.-R. Horng 25 (2001) 923

Flood control

- A stochastic approach to the flood control problem, M.G. Andrade, M.D. Fragoso and A.A.F.M. Carneiro 25 (2001) 499

Fokker-Planck equation

- A data assimilation method used with an ocean circulation model and its application to the tropical Atlantic, K.P. Belyaev, C.A.S. Tanajura and J.J. O'Brien 25 (2001) 655

Frequency-response characteristics

- Frequency-domain regression method for estimating CTF models of building multi-layer constructions, Y. Chen and S. Wang 25 (2001) 579

Frequency-shaping optimal control

- Robust observer-based frequency-shaping optimal vibration control of uncertain flexible linkage mechanisms, W.-H. Liao, J.-H. Chou and I.-R. Horng 25 (2001) 923

FSDT

- Nonlinear analysis of thick shallow spherical and conical orthotropic caps using Galerkin's method, G.P. Dube, S. Joshi and P.C. Dumir 25 (2001) 755

Full saturation

- The use of implicit flux limiting schemes in the simulation of the drying process: A new maximum flow sensor applied to phase mobilities, I.W. Turner and P. Perré 25 (2001) 513

Fundamental solution

- Fundamental solution and boundary integral equation of 3-D coupled thermoelasticity with non-small temperature changes in Laplace transform domain, M. Zhong and Y. Zhang 25 (2001) 347

Generalized finite differences

- Influence of several factors in the generalized finite difference method, J.J. Benito, F. Ureña and L. Gavete 25 (2001) 1039

Generalized thermoelasticity

- Fundamental solution and boundary integral equation of 3-D coupled thermoelasticity with non-small temperature changes in Laplace transform domain, M. Zhong and Y. Zhang 25 (2001) 347

Genetic factors

- Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar 25 (2001) 937

Geometric nonlinearity

- Transient evaporative laser-cutting with boundary element method, M.J. Kim 25 (2001) 25
Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang 25 (2001) 203

Geometrically nonlinear governing equations

- Static and dynamic stability for geometrically nonlinear governing equations of elastic thin shallow shells, F. Jiashe 25 (2001) 775

Global dynamic load balancing

- Parallel dynamic load balancing strategies for adaptive irregular applications, R. Biswas, S.K. Das, D.J. Harvey and L. Oliker 25 (2001) 109

Graph partitioning

- Load balancing fictions, falsehoods and fallacies, B. Hendrickson 25 (2001) 99
Multiphase mesh partitioning, C. Walshaw, M. Cross and K. McManus 25 (2001) 123

Groove shapes

- Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang 25 (2001) 203

Hamiltonian

- A revisit of spinning disk models. Part I: derivation of equations of motion, N. Badour and J.W. Zu 25 (2001) 541

Heat balance integral

- A new look at the heat balance integral method, A.S. Wood 25 (2001) 815

Heat conduction

Two-dimensional inverse heat conduction problem of source strength estimation in cylindrical rods, J. Su and A.J. Silva Neto

25 (2001) 861

Heterogeneity

A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption heterogeneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang

25 (2001) 1071

High compressible flows

Three-dimensional simulation of high compressible flows using a multi-time-step integration technique with subcycles, P.R.F. Teixeira and A.M. Awruch

25 (2001) 613

HVAC system

Frequency-domain regression method for estimating CTF models of building multilayer constructions, Y. Chen and S. Wang

25 (2001) 579

Hydraulic networks

The differential perturbative method applied to the sensitivity analysis for water-hammer problems in hydraulic networks, J.L. Balaño, A.E. Larreguy, A.C. Lorenzo, A.G. Padilla and F.R. de Andrade Lima

25 (2001) 1117

Impedance

Assessment of controllability-observability from the impedance matrix, R. Whalley, D. Mitchell and M. Ebrahimi

25 (2001) 299

Integrable system

Smooth and non-smooth traveling waves in a nonlinearly dispersive equation, J. Li and Z. Liu

25 (2001) 41

Interface

A simple numerical approach for assessing coupled transport processes in partitioning systems, M.G. Trefry, J. Öhman and G.B. Davis

25 (2001) 479

Inverse problem

Noniterative solution of inverse problems by the linear least square method, J. Shaw

25 (2001) 683

An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan

25 (2001) 743

Two-dimensional inverse heat conduction problem of source strength estimation in cylindrical rods, J. Su and A.J. Silva Neto

25 (2001) 861

Iterative methods

Multilevel methods to solve the neutron diffusion equation, D. Ginestar, J. Marín and G. Verdú

25 (2001) 463

Lagrangian particle tracking

Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman

25 (2001) 803

Least square finite element method

Approximation of the RLW equation by the least square cubic B-spline finite element method, İ. Dağ and M. Naci Özer

25 (2001) 221

Least square method

Noniterative solution of inverse problems by the linear least square method, J. Shaw

25 (2001) 683

Linear vibrations

A revisit of spinning disk models. Part II: linear transverse vibrations, N. Baddour and J.W. Zu

25 (2001) 561

Load balancing

Load balancing fictions, falsehoods and fallacies, B. Hendrickson

25 (2001) 99

Multiphase mesh partitioning, C. Walshaw, M. Cross and K. McManus

25 (2001) 123

Lyapunov matrix equation

Coupling dual reciprocity BEM and differential quadrature method for time-dependent diffusion problems, M. Tanaka and W. Chen

25 (2001) 257

M/G/1 queues

- On the *M/G/1* queue with *D*-policy, J.R. Artalejo 25 (2001) 1055

Magnetic chromatography

- A numerical model for magnetic chromatography, K.C. Karki, E.R. Whitby, S.V. Patankar, C. Winstead, T. Ohara and X. Wang 25 (2001) 355

Marked point process

- The general cumulants for a filtered point process, S. Yue and M. Hashino 25 (2001) 193

Mathematical modelling

- Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar 25 (2001) 937

Measure data

- Numerical convergence for a sewage disposal problem, L.J. Alvarez-Vázquez, A. Martínez, C. Rodríguez and M.E. Vázquez-Méndez 25 (2001) 1015

Mesh partitioning

- Dynamic load-balancing of finite element applications with the DRAMA library, A. Basermann, J. Clinckemaiellie, T. Coupez, J. Fingberg, H. Digonnet, R. Ducloux, J.-M. Gratien, U. Hartmann, G. Lonsdale, B. Maerten, D. Roose and C. Walshaw 25 (2001) 83
- Multiphase mesh partitioning, C. Walshaw, M. Cross and K. McManus 25 (2001) 123

Meshless methods

- Influence of several factors in the generalized finite difference method, J.J. Benito, F. Ureña and L. Gavete 25 (2001) 1039

Message passing

- Parallel Schur complement method for large-scale systems on distributed memory computers, S. Kocak and H.U. Akay 25 (2001) 873

Method of successive iteration

- Simplified analysis of mode III dynamic rupture with geometric nonlinearity, F. Jia-shen 25 (2001) 793

Mixing

- A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption heterogeneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang 25 (2001) 1071

Mode III dynamic rupture

- Simplified analysis of mode III dynamic rupture with geometric nonlinearity, F. Jia-shen 25 (2001) 793

Modelling

- A revisit of spinning disk models. Part I: derivation of equations of motion, N. Bad-dour and J.W. Zu 25 (2001) 541

Models

- Assessment of controllability-observability from the impedance matrix, R. Whalley, D. Mitchell and M. Ebrahimi 25 (2001) 299

Moment relationships

- On the *M/G/1* queue with *D*-policy, J.R. Artalejo 25 (2001) 1055

Monte Carlo Markov chain

- A stochastic approach to the flood control problem, M.G. Andrade, M.D. Fragoso and A.A.F.M. Carneiro 25 (2001) 499

Moving least squares

- Influence of several factors in the generalized finite difference method, J.J. Benito, F. Ureña and L. Gavete 25 (2001) 1039

Multilevel methods

- Multilevel methods to solve the neutron diffusion equation, D. Ginestar, J. Marín and G. Verdú 25 (2001) 463

Multi-time-step integration

- Three-dimensional simulation of high compressible flows using a multi-time-step integration technique with sub-cycles, P.R.F. Teixeira and A.M. Awruch 25 (2001) 613

Multivariable sliding mode control

- MIMO sliding mode control of a distributed parameter denitrifying biofilter, O. Boubaker, J.P. Babary and M. Ksouri 25 (2001) 671

Neutron diffusion equation

- Multilevel methods to solve the neutron diffusion equation, D. Ginestar, J. Marín and G. Verdú 25 (2001) 463

NOAA/GFDL MOM_2 ocean circulation model

- A data assimilation method used with an ocean circulation model and its application to the tropical Atlantic, K.P. Belyaev, C.A.S. Tanajura and J.J. O'Brien 25 (2001) 655

Non-equilibrium parameters

- Numerical study of turbulent diesel flow in a pipe with sudden expansion, E.D. Koronaki, H.H. Liakos, M.A. Founti and N.C. Markatos 25 (2001) 319

Nonlinear

- Nonlinear analysis of thick shallow spherical and conical orthotropic caps using Galerkin's method, G.P. Dube, S. Joshi and P.C. Dumir 25 (2001) 755

Numerical convergence

- Numerical convergence for a sewage disposal problem, L.J. Alvarez-Vázquez, A. Martínez, C. Rodríguez and M.E. Vázquez-Méndez 25 (2001) 1015

Numerical differentiation

- An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan 25 (2001) 743

Numerical integration

- An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan 25 (2001) 743
- Numerical integration of logarithmic and nearly logarithmic singularity in BEMs, V. Sladek, J. Sladek and M. Tanaka 25 (2001) 901

Numerical modelling

- An assessment of turbulence models applied to the simulation of a two-dimensional submerged jet, B. Guo, T.A.G. Langrish and D.F. Fletcher 25 (2001) 635

Numerical simulation

- A numerical model for magnetic chromatography, K.C. Karki, E.R. Whitby, S.V. Patankar, C. Winstead, T. Ohara and X. Wang 25 (2001) 355

Observability

- Assessment of controllability-observability from the impedance matrix, R. Whalley, D. Mitchell and M. Ebrahimi 25 (2001) 299

Odor

- Modelling lumped-parameter sorption kinetics and diffusion dynamics of odour-causing VOCs to dust particles, Y.-L. Yeh, C.-M. Liao, J.-S. Chen and J.-W. Chen 25 (2001) 593
- A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption heterogeneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang 25 (2001) 1071

Orthotropic

- Nonlinear analysis of thick shallow spherical and conical orthotropic caps using Galerkin's method, G.P. Dube, S. Joshi and P.C. Dumir 25 (2001) 755

Oscillation

- An assessment of turbulence models applied to the simulation of a two-dimensional submerged jet, B. Guo, T.A.G. Langrish and D.F. Fletcher 25 (2001) 635

Parabolic flux limiter

The use of implicit flux limiting schemes in the simulation of the drying process: A new maximum flow sensor applied to phase mobilities, I.W. Turner and P. Perré

25 (2001) 513

Parabolic partial differential equations

An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan

25 (2001) 743

Parallel computer

Load balancing fictions, falsehoods and fallacies, B. Hendrickson

25 (2001) 99

Parallel computing

Parallel dynamic load balancing strategies for adaptive irregular applications, R. Biswas, S.K. Das, D.J. Harvey and L. Oliker

25 (2001) 109

Parallel multiphysics

Multiphase mesh partitioning, C. Walshaw, M. Cross and K. McManus

25 (2001) 123

Parallel Schur complement

Parallel Schur complement method for large-scale systems on distributed memory computers, S. Kocak and H.U. Akay

25 (2001) 873

Parallel shooting method

Designing the shape of a large scientific balloon, F. Baginski, Q. Chen and I. Waldman

25 (2001) 953

Particle deposition

Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman

25 (2001) 803

Partitioning

A simple numerical approach for assessing coupled transport processes in partition-

ing systems, M.G. Trefry, J. Öhman and G.B. Davis

25 (2001) 479

Periodic waves

Smooth and non-smooth traveling waves in a nonlinearly dispersive equation, J. Li and Z. Liu

25 (2001) 41

Phase change

A new look at the heat balance integral method, A.S. Wood

25 (2001) 815

Piezoelectric materials

Robust observer-based frequency-shaping optimal vibration control of uncertain flexible linkage mechanisms, W.-H. Liao, J.-H. Chou and I.-R. Horng

25 (2001) 923

PIRATA project

A data assimilation method used with an ocean circulation model and its application to the tropical Atlantic, K.P. Belyaev, C.A.S. Tanajura and J.J. O'Brien

25 (2001) 655

Predator-prey communities

Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar

25 (2001) 937

Pulsed laser

Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang

25 (2001) 203

Random loading

Fatigue crack growth under variable-amplitude loading: Part II - Code development and model validation, A. Ray and R. Patankar

25 (2001) 995

RBC

Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu

25 (2001) 1025

- Regularized long wave (RLW) equation*
- Approximation of the RLW equation by the least square cubic B-spline finite element method, İ. Dağ and M. Naci Özer 25 (2001) 221
- Reliability analysis*
- A stochastic approach to the flood control problem, M.G. Andrade, M.D. Frago and A.A.F.M. Carneiro 25 (2001) 499
- Renewal theory*
- On the M/G/1 queue with D-policy, J.R. Artalejo 25 (2001) 1055
- River modelling*
- Modelling of U, Th, Ra and ^{137}Cs radionuclides behaviour in rivers. Comparison with field observations, M.J. Rodriguez-Alvarez and F. Sanchez 25 (2001) 57
- Robustness*
- Robust observer-based frequency-shaping optimal vibration control of uncertain flexible linkage mechanisms, W.-H. Liao, J.-H. Chou and I.-R. Horng 25 (2001) 923
- Second-moment closure*
- Numerical study of turbulent diesel flow in a pipe with sudden expansion, E.D. Koronaki, H.H. Liakos, M.A. Founti and N.C. Markatos 25 (2001) 319
- Sensitivity analysis*
- The differential perturbative method applied to the sensitivity analysis for water-hammer problems in hydraulic networks, J.L. Baliño, A.E. Larreteguy, A.C. Lorenzo, A.G. Padilla and F.R. de Andrade Lima 25 (2001) 1117
- Sequence effects*
- Fatigue crack growth under variable-amplitude loading: Part I – Model formulation in state-space setting, A. Ray and R. Patankar 25 (2001) 979
- Fatigue crack growth under variable-amplitude loading: Part II – Code development and model validation, A. Ray and R. Patankar 25 (2001) 995
- Series*
- Assessment of controllability-observability from the impedance matrix, R. Whalley, D. Mitchell and M. Ebrahimi 25 (2001) 299
- Sewage disposal*
- Numerical convergence for a sewage disposal problem, L.J. Alvarez-Vázquez, A. Martínez, C. Rodríguez and M.E. Vázquez-Méndez 25 (2001) 1015
- Simulation*
- Frequency-domain regression method for estimating CTF models of building multilayer constructions, Y. Chen and S. Wang 25 (2001) 579
- Simulation nuclear plant accident*
- Modelling of U, Th, Ra and ^{137}Cs radionuclides behaviour in rivers. Comparison with field observations, M.J. Rodriguez-Alvarez and F. Sanchez 25 (2001) 57
- Smoothness of waves*
- Smooth and non-smooth traveling waves in a nonlinearly dispersive equation, J. Li and Z. Liu 25 (2001) 41
- Software library*
- Dynamic load-balancing of finite element applications with the DRAMA library, A. Basermann, J. Clinckemillie, T. Coupez, J. Fingberg, H. Dignonnet, R. Ducloux, J.-M. Gratien, U. Hartmann, G. Lonsdale, B. Maerten, D. Roose and C. Walshaw 25 (2001) 83
- Solitary waves*
- Smooth and non-smooth traveling waves in a nonlinearly dispersive equation, J. Li and Z. Liu 25 (2001) 41
- Source parameter*
- An inverse problem of finding a source parameter in a semilinear parabolic equation, M. Dehghan 25 (2001) 743

Species extinction problem

- Species extinction problem: genetic vs ecological factors, R.K. Upadhyay, V. Rai and S.R.K. Iyengar 25 (2001) 937

Speedup

- Parallel Schur complement method for large-scale systems on distributed memory computers, S. Kocak and H.U. Akay 25 (2001) 873

Spinning disk

- A revisit of spinning disk models. Part I: derivation of equations of motion, N. Baddour and J.W. Zu 25 (2001) 541
A revisit of spinning disk models. Part II: linear transverse vibrations, N. Baddour and J.W. Zu 25 (2001) 561

Stability problem

- Static and dynamic stability for geometrically nonlinear governing equations of elastic thin shallow shells, F. Jiashen 25 (2001) 775

State-space modeling

- Fatigue crack growth under variable-amplitude loading: Part I – Model formulation in state-space setting, A. Ray and R. Patankar 25 (2001) 979
Fatigue crack growth under variable-amplitude loading: Part II – Code development and model validation, A. Ray and R. Patankar 25 (2001) 995

Statistics

- The general cumulants for a filtered point process, S. Yue and M. Hashino 25 (2001) 193

Steady-state probabilities

- On the *M/G/1* queue with *D*-policy, J.R. Aratalejo 25 (2001) 1055

Submerged jet

- An assessment of turbulence models applied to the simulation of a two-dimensional submerged jet, B. Guo, T.A.G. Langrish and D.F. Fletcher 25 (2001) 635

Substructuring

- Parallel Schur complement method for large-scale systems on distributed memory computers, S. Kocak and H.U. Akay 25 (2001) 873

Sudden expansion

- Numerical study of turbulent diesel flow in a pipe with sudden expansion, E.D. Koronaki, H.H. Liakos, M.A. Founti and N.C. Markatos 25 (2001) 319

Symmetric broadcast networks

- Parallel dynamic load balancing strategies for adaptive irregular applications, R. Biswas, S.K. Das, D.J. Harvey and L. Oliker 25 (2001) 109

Thick cap

- Nonlinear analysis of thick shallow spherical and conical orthotropic caps using Galerkin's method, G.P. Dube, S. Joshi and P.C. Dumir 25 (2001) 755

Threshold curve

- Finite element analysis of evaporative cutting with a moving high energy pulsed laser, M.J. Kim and J. Zhang 25 (2001) 203

Time integration

- Coupling dual reciprocity BEM and differential quadrature method for time-dependent diffusion problems, M. Tanaka and W. Chen 25 (2001) 257

TNCU

- Modelling the steady-state effluent characteristics of the TNCU process under different return mixed liquid, T.Y. Pai, C.F. Ouyang, J.L. Su and H.G. Leu 25 (2001) 1025

Transfer function

- A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption hetero-

- geneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang 25 (2001) 1071
- Transient diffusion*
- Coupling dual reciprocity BEM and differential quadrature method for time-dependent diffusion problems, M. Tanaka and W. Chen 25 (2001) 257
- Transient evaporative laser-cutting*
- Transient evaporative laser-cutting with boundary element method, M.J. Kim 25 (2001) 25
- Transport*
- A simple numerical approach for assessing coupled transport processes in partitioning systems, M.G. Trefry, J. Öhman and G.B. Davis 25 (2001) 479
- Turbulence*
- Numerical study of turbulent diesel flow in a pipe with sudden expansion, E.D. Koronaki, H.H. Liakos, M.A. Founti and N.C. Markatos 25 (2001) 319
- Turbulence model*
- An assessment of turbulence models applied to the simulation of a two-dimensional submerged jet, B. Guo, T.A.G. Langrish and D.F. Fletcher 25 (2001) 635
- Two-dimensional heat and mass transfer*
- The use of implicit flux limiting schemes in the simulation of the drying process: A new maximum flow sensor applied to phase mobilities, I.W. Turner and P. Perré 25 (2001) 513
- Unsteady particle transport*
- A numerical model for magnetic chromatography, K.C. Karki, E.R. Whitby, S.V. Patankar, C. Winstead, T. Ohara and X. Wang 25 (2001) 355
- Unstructured mesh adaptation*
- Parallel dynamic load balancing strategies for adaptive irregular applications, R. Biswas, S.K. Das, D.J. Harvey and L. Oliker 25 (2001) 109
- Unstructured mesh generation*
- Calculating particle-to-wall distances in unstructured computational fluid dynamic models, M. Tambasco and D.A. Steinman 25 (2001) 803
- Validation*
- A simple numerical approach for assessing coupled transport processes in partitioning systems, M.G. Trefry, J. Öhman and G.B. Davis 25 (2001) 479
- Variable structure control*
- MIMO sliding mode control of a distributed parameter denitrifying biofilter, O. Boubaker, J.P. Babary and M. Ksouri 25 (2001) 671
- VOCs*
- Modelling lumped-parameter sorption kinetics and diffusion dynamics of odour-causing VOCs to dust particles, Y.-L. Yeh, C.-M. Liao, J.-S. Chen and J.-W. Chen 25 (2001) 593
- A transfer function model to describe odor causing VOCs transport in a ventilated airspace with mixing/adsorption heterogeneity, C.-M. Liao, J.-W. Chen, J.-S. Chen and H.-M. Liang 25 (2001) 1071
- Vortical mixer*
- Simplified turbulence modeling for forced vortical mixers using a kinematic wave analogy, L.J. De Chant and J.A. Seidel 25 (2001) 427
- Waterhammer*
- The differential perturbative method applied to the sensitivity analysis for waterhammer problems in hydraulic networks, J.L. Baliño, A.E. Larreteguy, A.C. Lorenzo, A.G. Padilla and F.R. de Andrade Lima 25 (2001) 1117
- Weak singularity*
- Numerical integration of logarithmic and nearly logarithmic singularity in BEMs, V. Sladek, J. Sladek and M. Tanaka 25 (2001) 901

Wood drying

The use of implicit flux limiting schemes in
the simulation of the drying process: A

new maximum flow sensor applied to
phase mobilities, I.W. Turner and P.
Perré

25 (2001) 513
